LEADING LADIES FOUNDATION- WOMEN ECONOMIC CAMPAIGN

The Leading Ladies Empowerment Foundation (LLF) is a non-governmental organization with a mission to inspire and empower the 21st century woman for financial freedom, leadership in career, business and politics through the vehicles of mentoring and training.

Through the establishment of the Leading Ladies Business Institute (LLBI; Nigeria's maiden business school for women) in 2016, LLF has trained over 9,000 women till date deploring its world class business and financial training through a plethora of training programs, business growth workshops and group mentoring sessions.

The leading ladies foundation was born out of a passion to help the everyday African woman discover her genius and fulfill her often forgotten or neglected dreams. This we have done relentlessly since 2016. We believe African women still remain "a powerful untapped economic force" and will be absolutely integral in addressing the development challenges Africa faces. As such, our goal as an organization is to bridge the gap for women through world-class business and financial education.

Women empowerment programs stand as the key component necessary to help women make better life choices in marriage, build a sustainable business and raise the next generation of children. Our nation and continent as whole will stagger and struggle if half the population (women) are not exposed to quality financial and business education.

It is clear that Nigeria has a long way to go when it comes to unlocking the gender dividend through the economic empowerment of women. The daunting statistics of marginalization against women show that we must act fast and act now to preserve a generation and Africa's rich heritage of human capital.

By creating power in one woman, an entire community or society can be transformed. This is why the Leading Ladies Foundation has begun a relentless campaign towards bridging this gap, through our flagship training - 'Women Economic Empowerment Program (W.E.E.P)', our objective is to increase access to knowledge that causes a paradigm shift in the 21st century woman, empowering her to make quality life's decisions and sound financial and business decisions within an era for vast technological innovations and advancement!

Leading Ladies Foundation

The training program is administered through the Leading Ladies Business Institute for FREE, but participants will require workbooks on financial intelligence and business intelligence workbooks at the rate of One Thousand Naira each, participants get to learn how to kick start their own business, learn how to structure such business, understand the basis of wealth creation and building sustainable wealth.

Over time we have had individuals and organizations sponsor scores of women and also inform LLF of communities of women who they think would benefit from the program. We write to you because we are convinced that you relate with people in our target audience, and you can help us reach them in two ways:

- Introducing us to a group of women(at least50)
- You can choose to sponsor a number of women LLF already has on ground with your monetarycontribution.

We look forward to having a productive discussion with you and forming lasting relationships of social impact.

Thank you.

Yours sincerely,

Isoa Okojie
